Outline

- Engineering With Nature (EWN) Background
- ProMap Database Demonstration
 - Overview
 - Site Tools
 - Site Information Examples
 - Site Screening & Searching
 - Submitting Sites
- ProMap Evolution
- Discussion

Engineering With Nature is...

...the intentional alignment of natural and engineering processes to efficiently and sustainably deliver economic, environmental and social benefits associated with water resources infrastructure through collaborative processes.

Key Ingredients:

- Science and engineering that produces operational efficiencies
- Using natural process to maximum benefit
- Broaden and extend the benefits provided by projects
- Science-based collaborative processes to organize and focus interests, stakeholders, and partners

The USACE Navigation Mission

To provide safe, reliable, efficient, effective and **environmentally sustainable** waterborne transportation systems for movement of commerce, national security needs, and recreation

The USACE Environmental Operating Principles

US Army Corps
of Engineers®

ENVIRONMENTAL OPERATING PRINCIPLES

One Corps Serving The Army and the Nation

Further information is available at: <http://www.usace.army.mil>

*Environmental
Sustainable Housing
Fort Lee, VA*

*Endangered Whooping Crane
Aransas National Wildlife Refuge, Texas*

*Planting a tree within
Mississippi Delta*

*Listening to the public at
Lake Hartwell drought meeting*

*Corps labs support research and
development in Far East District*

*Alligator as found
in Everglades*

1 Strive to achieve Environmental Sustainability. An environment maintained in a healthy, diverse, and sustainable condition is necessary to support life.

2 Recognize the interdependence of life and the physical environment. Proactively consider environmental consequences of Corps programs and act accordingly in all appropriate circumstances.

3 Seek balance and synergy among human development activities and natural systems by designing economic and environmental solutions that support and reinforce one another.

4 Continue to accept corporate responsibility and accountability under the law for activities and decisions under our control that impact human health and welfare and the continued viability of natural systems.

5 Seek ways and means to assess and mitigate cumulative impacts to the environment; bring systems approaches to the full life cycle of our processes and work.

6 Build and share an integrated scientific, economic and social knowledge base that supports a greater understanding of the environment and impacts of our work.

7 Respect the views of individuals and groups interested in Corps activities; listen to them actively, and learn from their perspective in the search to find innovative win-win solutions to the Nation's problems that also protect and enhance the environment.

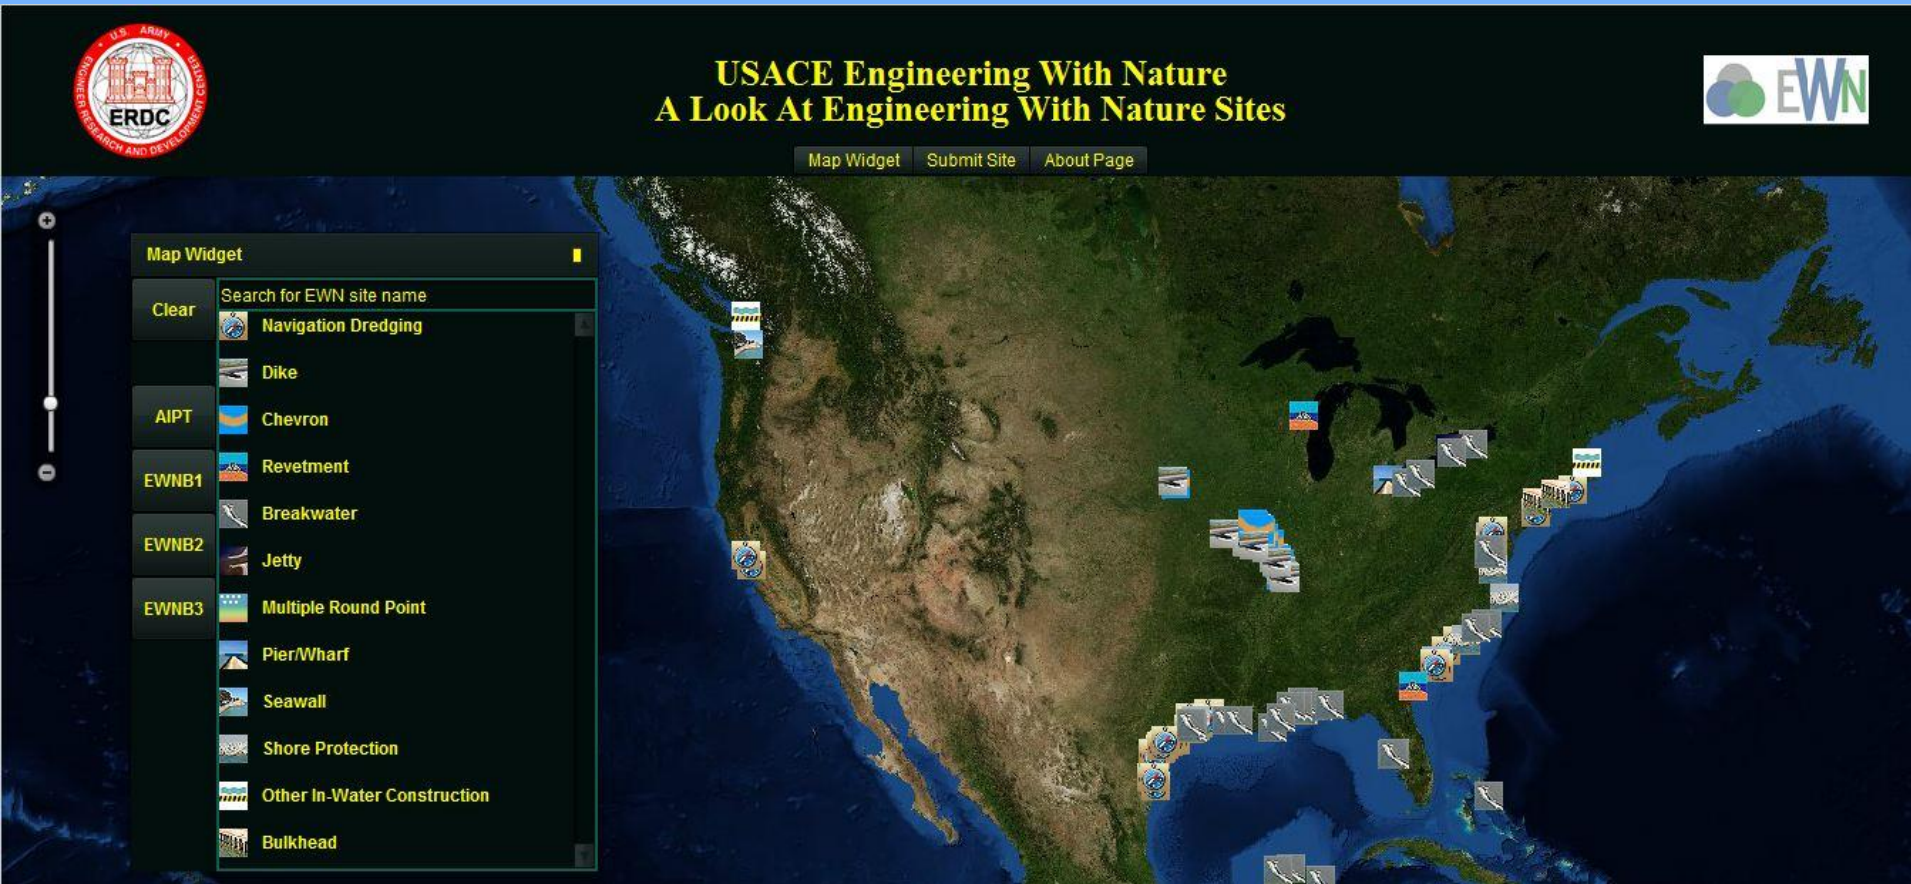

Opportunities/Existing Examples

EWN ProMap (project mapper)

interactive on-line catalog of case studies that apply the EWN concept.

<http://155.82.160.6/applications/opj/V013/public/viewer.swf>
or from <http://el.erdc.usace.army.mil/ewn/index.html>

EWN ProMap (project mapper)

Live Demo

<http://155.82.160.6/applications/opj/V013/public/viewer.swf>

or from <http://el.erdc.usace.army.mil/ewn/index.html>

ProMap Evolution

- Currently based on
 - Esri's ArcGIS Application Programming Interface (API) for Flex 3.0
 - ArcGIS Online
- Moving to
 - HTML5/CSS/JavaScript architecture
 - ArcGIS Portal
 - Better Photo & Document Capabilities
 - Greater Collaboration Options
 - Easier Maintenance

Discussion
